

IS YOUR CELLPHONE (MINI MICROWAVE...)

COOKING YOUR BRAIN?!

MRI imaging done by Dr. Devra Davis, a leading epidemiologist, on an adult and on a 3 year old child, showing radiation levels after 6 minute cellphone talk

“Cellphone-Cancer Link Found in Government Study” - The Wall Street Journal, May 28, 2016

- ✓ Based on a multiyear [study by the National Toxicology Program](#) which found that Rats exposed to heavy cell use - had a greater risk of being diagnosed with brain tumors as brain metabolism altered.

SafeBudz1

Solution:

SAFEHUDZ, PATENTED EARPHONES WHICH BLOCK ALL RADIATION TO YOUR BRAIN

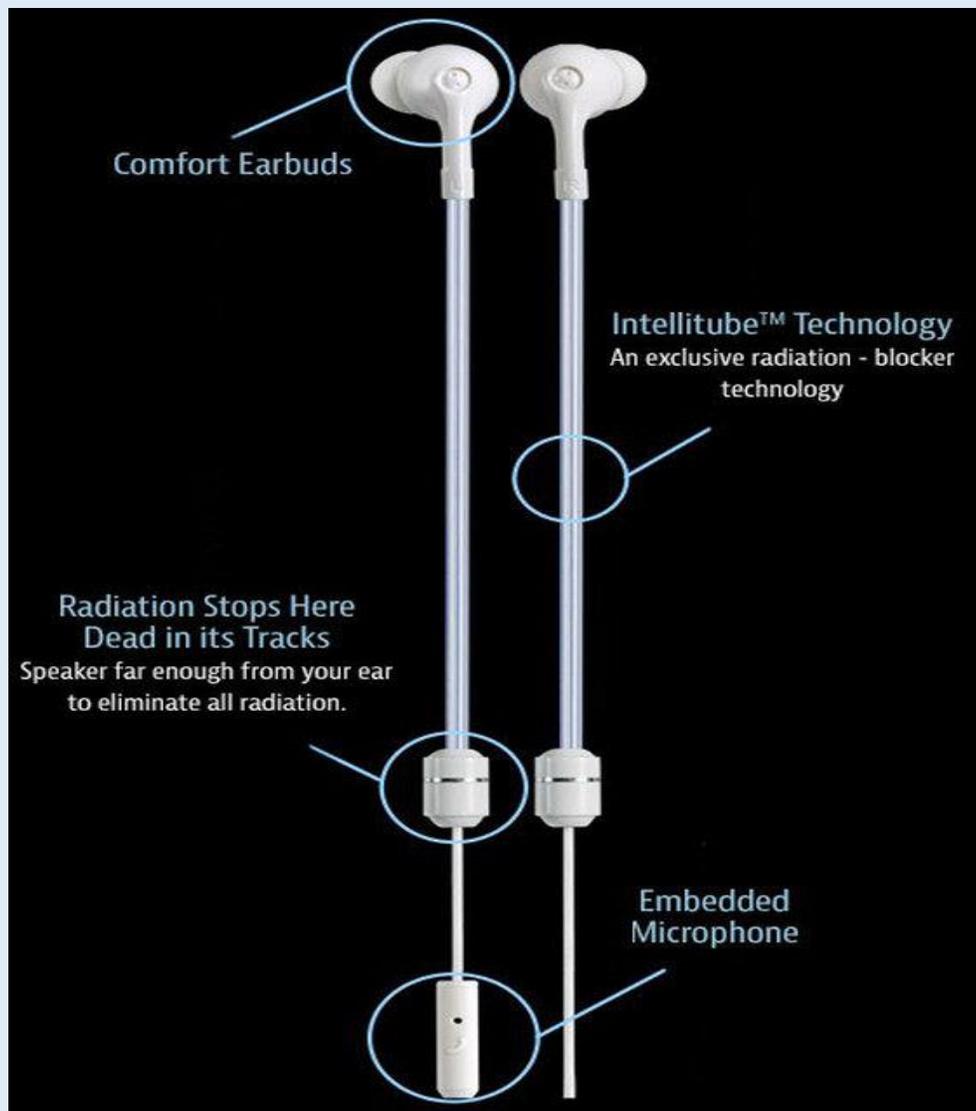

WHY SAFEBUDZ ARE THE SAFEST DEVICE TO BLOCK CELLPHONE RADIATION?

✓ **SafeBudz** are breakthrough earphones that **Eliminate 100% of the harmful radiation emanating from cell phones that goes to the brain.** Unlike regular earphones or Bluetooth headsets that still carry harmful RF energy to the head.

SafeBudz blocks it all.

How does it work?

SafeBudz innovative design **moves the speaker further away from your brain** making it completely safe for sustained use. Plus the **patented Intellitube sound delivery system (sound passes through air chamber) produces a "Live" high-fidelity"** experience that's natural and balanced.

SafeBudz are ergonomically shaped for all day comfort and come in **Mono and Stereo models.**

Safebudz are so safe, a child could use them!

...yes, our cellphones cooking our brains!
And the latest studies point to it!

- **"BIG TOBACCO"...** it was one of the biggest cover-ups of all time! And now, \$175 billion a year **"BIG CELLULAR"** works hard to prove there is **"no proof"...** Big government and cellular companies are **hiding the effects of the radiation!**

...**but many of about 15,000 studies** and the truth are starting to get noticed! And they show the adverse effects on human tissue!

WORLD HEALTH ORGANIZATION (WHO)

WARNING:

IN 2011 WHO declared that **CELLPHONES ARE POSSIBLY CARCINOGENIC** to humans, putting them in the same **group 2 classification as exhaust fumes and lead.**

Dr. Anthony Miller, Cancer researcher and an adviser to the World Health Organization (WHO):

..."Radiation from cellphones, cordless, sensor devices and wireless networks should be **RE-CLASSIFIED** as a...
Group 1 carcinogenic to Humans"!!! ...putting it in the **same category as tobacco smoke, benzene, ultraviolet radiation, asbestos, arsenic, radon 222 and 226**!!! [Read more](#)

"The evidence indicating wireless is carcinogenic has increased and can no longer be ignored," Dr. Miller said July 31st at a meeting of the Environmental Health Trust in Teton, Wyoming.

Miller believes evidence since WHO announcement in 2011 fulfills the requirements to re-classify RF radiation as a "Group 1 carcinogenic to humans" agent.

Miller cited recent scientific publications including the 2017 re-analysis of data from the Interphone study, the 2014 French National CERENAT Study, several new publications on Swedish cancer data, and the 2016 results of the National Toxicology Program

In addition, published **epidemiological research** has also found persons diagnosed with brain cancer had decreased survival rates associated with higher wireless phone use.

CANCER RISK –“THERE IS NO EVIDENCE...”

In response to skeptics...and **industry funded studies**, who claim "There is no evidence," researchers point to numerous published research that has consistently **found increased cancer risk in well-designed case control studies** that have looked at persons who used cell phones for more than ten years.

Dr. David Carpenter on wireless cancer risks

Dr. David Carpenter, is a co-author of the Bio initiative Report and director of the Institute for Health and the Environment at the University of Albany.

Dr. Carpenter **studies include cell phones and brain cancer risk**, children's risk, high intensity pulses from smart meters, 60 HZ fields, radio towers, Obama supported Wi-Fi in schools and electro sensitivity.

“The evidence is overwhelming” that **cell phones increase your risk of brain cancer**, and **children are at 5 fold greater risk**.

“Children are by far the most vulnerable.” Regarding Wi-Fi in schools, “everyone will be adversely affected.” [Read more](#)

THE SCARY TRUTH... FCC SET JOKE REGULATIONS...

- The FCC set limits on the SAR (specific absorption rates) levels: 1.6 watts per KG.

Problem is – these “safety” tests are a HUGE JOKE! ... FCC allows the phones to be **tested from 1 inch away from the body...**

...but everyone holds the phone glued to the ear or put in a pocket! In other words –radiation levels decrease exponentially with distance and 1 inch REDUCES radiation by about 50 %.

- It’s a MISLEADING test and **that 1 stupid inch could be the difference between disease and a healthy life...!**
- Bottom line: RADIATION FROM A PHONE HELD AGAINST THE EAR CAN BE ALMOST 50 TIMES GREATER THAN FROM A PHONE 1 INCH AWAY!

...but when you 1 inch away... you can’t hear...

✓ SAFEBUDZ WAS CREATED TO SOLVE THIS PROBLEM!!!

Safebudz creates **6 inches distance between your brain and the radiation source**...giving you a safe distance “beyond the call of duty” and in the process, an **unsurpassed sound quality!** (Due to the sound flowing through the air chamber).

Would you stick your head in a microwave....?!

... So why hold the phone (**mini microwave**) against your ears...?! Unknowingly, we participate in a massive global EXPERIMENT and we are playing Russian roulette with our health!!!

- **Average person spends 4.7 hours a day on the phone, 17,000 hours a year** but have no idea what it do to their chances of getting chronic diseases, effect on the DNA, skin, reproductive organs and Mitochondria.
- In fact, holding the phone is like holding a **mini microwave!**

Remember the **BIG TOBACCO SCANDAL OF THE 40'S AND 50'S?!** Are we for a similar **BIG CELLULAR MASSIVE GLOBAL HEALTH EXPERIMENT?!**

In the 40's and 50's society was not aware of the dangers in smoking. **People believed cigarettes are safe because "everyone is doing it"**.

For many years **"big tobacco" perpetrated probably the biggest cover up in history!** Already in the 50's they knew their products are deadly but spent Billions to suppress the information!

- ONE CAN'T IGNORE THE SIMILARITIES TO TODAY CELLPHONE DISCUSSION!
- CELLPHONES COULD HAVE AN EVEN GREATER IMPACT - **95% OWN A PHONE. ONLY 15% OF AMERICANS ARE SMOKERS...** (NOT TO MENTION THAT 88% OF TEENS OWN A PHONE)...

AND UNLIKE CIGARETTES, PHONES ARE NECESSRY!

Remember the LOUSY 1 INCH...that reduces radiation almost 50 times...?

...SAFEHUDZ CREATED THAT DISTANCE...AND EVEN MORE: 6 INCHES AWAY FROM YOUR BRAIN!

RESULTS – ZERO RADIATION TO YOUR BRAIN!!!

safehudz

A BASIC GAUSS METER TEST VALIDATES: **SAFEUDZ
BLOCK 100% OF THE RADIATION TO THE BRAIN!**

**USING REGULAR EARBUDS
(HIGH RADIATION LEVELS)**

**PHONE HELD AGAINST THE EAR
(HIGHEST RADIATION LEVELS)**

USING SAFEUDZ – ZERO RADIATION!

Know your environment.
Protect your health.

**EWG (ENVIRONMENTAL WORKING GROUP) ADVISING
LOWERING CELLPHONE RADIATION REGULATIONS**

More research is needed, but numerous **studies cast doubt on the adequacy of the existing Federal Communications Commission limits on cell phone radiation** to safeguard public health.

The FCC rules, published in 1996 and never updated, were based on studies conducted in the 1980s, before cell phones were as common or frequently used. They do not account for risks to children's developing brains and consider only short-term cell phone use – not frequent calling every day for decades.

As EWG reported, **people who hold their phones directly against their bodies or use cell phone cases could receive more radiation than the FCC limit because of flaws in the agency's testing guidelines**. These flaws must be fixed so that the FCC regulations reflect how people actually use their phones.

Four years have passed since the FCC opened the inquiry into cell phone standards. Why has the commission not acted?

Now more than ever, American **cell phone users need real-world, relevant data on how much radiation** phones, and the other wireless devices all around us, emit under various circumstances.

Until this information is publicly available, *taking steps to lower exposure to wireless radiation is prudent*.

✓ **Enter SAFEBUDZ, the ultimate protector from cellphone radiation!**

See informative presentation, featuring Dr. Oz, Dr. Gupta, leading epidemiologist Dr. Devra Davis and additional experts on radiation

Memorial Sloan-Kettering Cancer Center researchers: **EMF from your Cell causes brain tissue to heat up!**

Using a first-of-its-kind technique for measuring electromagnetic radiation, researchers found the radiofrequency field generated by your cell phone causes brain tissue to heat up. This proves **Your brain is absorbing radiation from your cell**, study author David Gultekin, Ph.D., a researcher at the Memorial Sloan-Kettering Cancer Center in New York, told MensHealth.com.
